profit-sharing interest in the well to be drilled to hold this acreage and sliminate the fugiher annual rental. By bringing together vast holdings for my friends and associates. I am able to give them the individual opertunity they could never get otherwise and fat the same time I am able to hold intagt for our mutual benefit for future drilling with a certainty I will be given the preference at all times.

A double purpose is gained. We buy in large quantities at the lowest price. We hold and develop as our demands arise and as cash is available. I am thereby able to put to practical use trul co-operation. I can seepire whatever is needed for development as needed by paying for it. I thereby make money for the individual co-operation and I have beined all concerned in the

of individual co-operation and I have helped all concerned in the complete co-operative profit shar-

To Illustrate

If I go out and buy 80 acres or a ection of 640 acres for develop-ment. I use the funds of the drif-ing branch of the truste-ship and ing branch of the truste-ship and thereby create great lives for outsiders, who own the adjoining and surrounding eighties or section. If I do this development upon an 80 or section purchased from our own individual members, I do them the good turn and give the profit to those who have congested with me. Then I am deling all others a further good furn, because incidentally I am developing and creating further values for all the other individuals who have adjoining or surrounding property.

Title Perfect With State Protection deposits on Totals state landing regardless of where they live.

There is no other way on earth by which this opportunity to distribute 400. Gao across of Texas oil and gas tease permits on school lands could have ever come fato my hands except because my friends have enabled me to climb to getrong position as in oil developer and refiner. This conflicted is due to the targetive description of my efforts along constructive descriptions in a few short years.

I do not believe there is another opportunity like this or that there ever will be again. I do not believe there is another man in Texas who could get control of this magnificant combination of state and university holdings at this time, on such easy terms.
